

IN THE CLAIMS:

Please amend the claims, and add new claims 24 to 27 as follows:

1. (original) A portable selection device to select data associated with identifiable items comprising:

a selection interface to enter at least one data entry identifying at least one of said items; and

circuitry to enable recording of said at least one data entry.

2. (original) A portable device according to claim 1 further comprising a memory associated with said circuitry to store said at least one data entry.

3. (currently amended) A portable device according to claim 1 [~~or claim 2~~] further comprising an output port to transfer said at least one entry to a processing station adapted to process information related thereto.

4. (original) The device according to claim 3, wherein said circuitry comprises a wire connection to connect said device to said processing station.

5. (original) The device according to claim 1, further comprising a hand held enclosure accommodating said selection interface and said circuitry.

6. (original) The device according to claim 1, wherein said selection interface comprises a keypad.

7. (original) The device according to claim 1, wherein said selection interface comprises a code reader apparatus.

8. (original) The device according to claim 1, wherein said circuitry comprises a wireless transmitter.

9. (original) A system comprising:  
a selection device comprising a selection interface to enter at least one data entry identifying at least one identifiable item and circuitry to provide an output corresponding to said at least one data entry; and  
a processing station adapted to receive said at least one data entry and to process information related thereto.

10. (original) A system according to claim 9, wherein said selection device further comprises a memory to store said at least one data entry.

11. (currently amended) The system according to claim 9 [~~or claim 10~~], further comprising an output device associated with said processing station to produce an article relating to said at least one item.

12. (original) The system according to claim 11, wherein said output device comprises a printer to print an image relating to said at least one item.

13. (currently amended) The system according to claim 11 [~~or claim 12~~], wherein said output device comprises a recording device to record information relating to said at least one item.

14. (original) The system of claim 11, wherein said circuitry comprises a wire connection to connect said device to said processing station.

15. (original) The system of claim 11, wherein said article comprises a digital video article.

16. (original) The system of claim 11, wherein said article comprises an audio article.

17. (original) The system of claim 11, wherein said article comprises a personalized site of a computer communication network.

18. (original) The system of claim 9, wherein said selection device comprises a hand held enclosure accommodating said selection interface and said circuitry.

19. (original) The system of claim 9, wherein said selection interface comprises a keypad.

20. (original) The system of claim 9, wherein said selection interface comprises a code reader apparatus.

21. (original) The system of claim 9, wherein said circuitry comprises a wireless transmitter.

22. (currently amended) A method comprising:  
receiving at least one data entry identifying at least [one item] one item selected by a user;  
transferring the data entry to a processing device able to access information related to said at least one data entry; and  
retrieving said information.

23. (original) The method of claim 22 further comprising:  
producing an article based on said information.

24. (new) A portable device according to claim 2 further comprising an output port to transfer said at least one entry to a processing station adapted to process information related thereto.

25. (new) The system according to claim 10, further comprising an output device associated with said processing station to produce an article relating to said at least one item.

26. (new) The system according to claim 25, wherein said output device comprises a recording device to record information relating to said at least one item.

27. (new) The system according to claim 12, wherein said output device comprises a recording device to record information relating to said at least one item.
